19 April 1955

MEMORANDUM FOR:

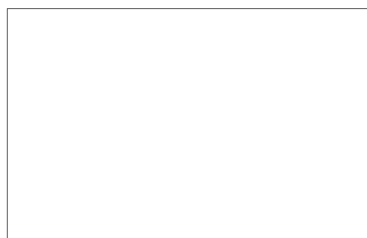

25X1

SUBJECT: Trailer for Perkin-Elmer

1. Military specification MIL-S-8168A(ASG) calls for a semitrailer-van air-transportable and air-conditioned to provide facilities for test and minor repair of aerial photographic equipment. The trailer has a 6-ton capacity which is probably too big for P-E requirements.

2. The USAF catalog reference is Code 5045 Serial 673357-869.

3. If we could determine P-E's requirements in weight and space at the 27 April meeting, we could probably come up with a firm recommendation for a suitable piece of equipment.
